

From the field to the home of every Guatemalan, agro is present every day

We promote development, well-being, and sustainability to build a better future.

Proposal to Political Parties

2 PRIORITIES

in government plans **2024-2028**

1 INFRASTRUCTURE FOR FOOD SECURITY AND EMPLOYMENT

For employment, investment, productivity, nutrition, and a better quality of life **WE NEED** a model that facilitate, accelerate, and secure:

- **Quality strategic infrastructure:** roads in optimal condition, rural roads, ports, and modern and efficient airports.
- **Productive infrastructure:** access to irrigation and facilitation for investment in cold room systems and gathering center; access to drinking water systems and proper management of water resources. Having quality infrastructure will allow attracting more investment, generating more and better jobs, improving productivity and the availability of inputs and food.

2

SECURITIES TO BE ABLE TO LIVE AND PRODUCE IN PEACE

In order to work, invest and produce **WE NEED** to guarantee:

- **Citizen security:** rule of law, strengthening of institutions and transparency to put an end to extortion, theft of products, invasions, and smuggling.
- **Legal certainty:** simple procedures, clear rules, and access to technology.

Farmers, producers, cooperatives, companies, suppliers of inputs and services in the agricultural sector, agroforestry, agro-industrial, agroexporter, together with the food and beverage industry, and transportation companies that we formed the strategic alliance called "**SOMOS EL AGRO**" we joined our voices within the framework of the process electoral 2023 to propose to the political parties to focus and prioritize the 2 actions on the government agenda priorities that can effectively accelerate job creation and inclusive economic growth generating development, well-being and sustainability for all Guatemalans.

Guatemala, April 12, 2023
